I'm looking for software or a program that can check the Battery Health of my laptop.. ClonyXXL is a copy protection detection scanner, which can show what kind of protection is used on a disc.. These include searching for bad sectors (you can select to scan each sector or every second, fifth or 10th), scanning for dummy files and actions to be performed before/after the detection process is finished.. Its interface is quite pleasant and colorful (the background can be changed to various colors); the default language is German, but you can easily switch to English from the Options menu.. Once that scheme is identified, you can start processing the content on that particular disk using dedicated tools..
